

HELLO WORLD..PizzaPages.com launches and brings social media to the world of Pizza

The long anticipated launch of PizzaPages.com is finally here. PizzaPages.com is an online pizza directory that utilizes social media, mobile applications and Text Message technology to bring pizza delivery shops in front of customers. Other features such as Real-Time Coupons and Menu-Creation are sure make Pizza Pages the number 1 choice for people looking to order Pizza.

FOR OFFICIAL RELEASE ON MARCH 15TH

(PRESS RELEASE) – March 3, 2010 -

Philadelphia based start-up PizzaPages.com has officially opened the doors to their online pizza shop directory on March 15th 2010. With the Online Directory customers will be able to view a pizza shop's contact information, location, reviews, specials, coupons and full menu with pricing. The Mobile Application and Text Message feature will be available to consumers in June. The Text Message feature allows a customer to text their "ZIP CODE" to the word "PIZZA" and in return receive the company information and coupon to a local pizza shop in their area.

See Image Below:

HUNGRY?

NO PROBLEM!
TEXT YOUR
"ZIP CODE"
TO THE WORD
PIZZA
(74992)

The reason why the Text message platform and Mobile application can't launch until June is because pizza shops must first be signed up and verified before any zip code can be turned on. Unlike the Online Directory which will be pre-populated with over 20,000 Pizza Shops Nationwide, the Text Message and Mobile application must have fully verified shops before launch. Unlike the Text Message platform which can be used by all Mobile carriers the Mobile application will be available for I-Phone subscribers only. Future plans for blackberries are already in place. This application will allow customers to easily locate pizza shops in their area and view their contact information and menu

ON THE NEXT PAGE YOU WILL FIND
EXAMPLES OF THE ONLINE MENU
FEATURE AND REAL TIME COUPONS

The "Online Menu" feature will show a full color menu with pricing and product descriptions. Pizza shops will have the ability to login in 24/7 and make adjustments to their menu which means what consumers are viewing will always be current and relevant. An example of what the menu looks like is shown below:

The "Real-Time Coupon" feature allows pizza shops to turn coupons on and off in real-time whenever they want. When a coupon is turned on or "live" it will show up inside the listing on the results page. This feature allows a customer to know what shops are offering specials and who aren't. Pizza Pages will have 3 coupons for every shop to choose from. Pizza Shops can also upload their own if they so choose.

An example of Real-Time Coupons is shown in this image (right):

WIN FREE PIZZA FOR A YEAR !

Starting immediately Pizzapages.com will hold a contest on YouTube. We are asking people to post a home-made pizza pages commercial on YouTube (The funnier the better). Pizza Pages will collect videos for 6 months or until they receive 50 videos. Pizzapages.com will then choose their favorite 3 and let fans vote on our web-site. The winner will receive 2 free pizzas a month for 1 year. Visit our site (Pizzapages.com) for official rules.

PRICING:

One of our best features is our advertising rates. Unlike other search engines who charge upwards of \$200 a month for a listing here at Pizzapages.com a basic listing start at only \$9.99 a month. That price even includes the Online Menu feature. PizzaPages.com also offers a **FREE** listing to all pizza shops. All of our **FREE** listings will be fully verified before being posted. Unlike other online business directories (Yellow Walking Fingers) we will not allow shops to have multiple listings with manipulated company names. All that does is clutter a directory and render it useless and unreliable.
